

PDA Sync With Desktop Computer

PDA: iPAQ, PocketPC2000, BlueMonitor, CF card, MS ActiveSync 3.5;
Desktop: Windows2000, BlueManager, usb dongle;

Steps:

1. Run BT software on both Desktop and PDA;
2. Run MS ActiveSync3.5 on desktop;
3. Connect PDA with Desktop by USB connection, so PDA will remember desktop's computer name;
4. Disconnect the Synchronization connection, on desktop side, File-->connection setting-->select 'Allow Serial cable or Infrared connection to this COM port', this COM port should be BT serial port;
5. To PDA, start-->programs-->connections-->ActiveSync
6. In 'Method' item, select Bluetooth, in 'Connect to' item, select the Desktop's computer name;
7. Click 'Connect';
8. In jump-out menu of Monitor, select the desktop you want to connect to, then click connect;
9. There will have an interface " connecting to desktop";
10. Connected;
11. Finished, you can see 'connection status' interface.
